

CCCM Syria- Sector

Meeting minutes

30- June- 2025

Agenda Item	Key Discussion Points	Action Items
Key updates from the Sector - Operational updates from the partners	<ul style="list-style-type: none"> The CCCM Sector prepared priority areas for both SHF and SCHF funding allocations. CCCM also contributed to the SHF review process by supporting the SHF unit in preparing for proposal evaluations. In 2025, two SCHF-funded projects have been approved so far. The first is being implemented by PIN in Menbij. The second project, amounting to \$450,000, was granted to ACTED through SHF to address gaps in NES camps following the suspension of USAID support. PIN is currently serving as the CCCM focal point for Menbij camps. On June 11, 2025, the CCCM Team in Aleppo conducted a field mission to Mashhad Ruhin camps to assess return movements and identify the support needs of the displaced population. The mission revealed that numerous families had already returned to their homes, often resorting to harmful coping strategies to cover their transportation expenses. As a result, the team recommended providing direct logistical support through the deployment of trucks and conducting additional surveys to inform future assistance efforts. CCCM Team in Aleppo has been collaborating with Muzun to carry out a comprehensive survey within the Mashhad Ruhin camps. This area was selected due to its significant population from Marat Al Numan, which is a key return area. The findings from this survey will be instrumental for CCCM and UNHCR in starting a pilot project to support the return. other areas might be considered at later stages. The development of sub-national ToRs is delayed pending the HCT retreat in mid-July. Following national level consolidation on ToRs and co-leadership, sub-national levels can follow. The NES All Camps coordination meeting is scheduled for 6 July. ACTED has resumed CCCM activities in camps across NES. UNHCR's CCCM team supported the facilitation of 10 voluntary return movements from Al Areesha camp, supporting the return of 395 families returned to area of origin out of a total 	

	<p>of 635 families departed Areesha camp since Dec 2024. preparation for the 11th group is underway It is also worth mentioning that there has been a decrease in the willingness of IDPs to return to their areas of origin from Areesha camp, due to the lack of services and humanitarian support in Deir ez-Zor (DeZ)</p> <ul style="list-style-type: none"> • Informal Settlements do not have a formal site management in NES which makes recording figures hard. Evidence from some sites suggests about 22% of residents having departed, one InSe has decreased by 50% - all in Raqqa countryside. • Abo Khashab camp is facing critical WASH-related needs, with several cases of diarrhea reported. UNICEF has confirmed they will take up water trucking (Water trucking is supposed to resume within two days) • ACTED plans to expand its CCCM coverage to include urban CCCM in Deir Ez-Zour/on the GoS-side of the Euphrates.Details to be discussed with CCCM sector, in consultation with UNOCHA 	
Closure and consolidation of IDP sites	<ul style="list-style-type: none"> • A total of 163 IDP sites have been inactivated in the CCCM IDP Sites list since December 2024. Majority population have returned to their homes, settled amongst local communities or merged/relocated to other sites; These sites previously hosted 98,652 IDPs, including: <ul style="list-style-type: none"> - 84,400 IDPs in 139 closed sites - 14,252 IDPs in 24 merged sites • No significant return movements have been reported from IDP sites in Raqqa, where most camp residents originate from Aleppo and Hama. • IDPs in Deir-ez-Zor camps face challenges in returning to their areas of origin due to the poor conditions of basic services, mine contamination and infrastructure in those locations. • The consolidation of camps in NES will be discussed with the authorities once there is a notable increase in the number of families returning to their areas of origin. 	

<p>IDPs Sites Integrated Monitoring Matrix (ISIMM) Update</p>	<ul style="list-style-type: none"> As of May 2025, the CCCM database includes 1,782 IDP sites that host 1,648,799 Individuals/ 310,282 Households. Of these, 79% are women and children, and 53,113 IDPs are reported to be persons with disabilities. During May, 63 sites were deactivated due to site closures and mergers, primarily driven by the return of IDPs to their areas of origin following recent developments. This has led to a net decrease of 234,588 individuals compared to the April update. 	<ul style="list-style-type: none"> Separate analyses will be developed for camps in Northeast Syria (NES) and Northwest Syria (NW). Starting July 2025, reporting for both ISIMM and 4Ws will be conducted exclusively through ActivityInfo.
<p>Displacement Movements</p>	<ul style="list-style-type: none"> 149,080 IDPs have departed from IDP sites in Aleppo. 467,117 IDPs have departed from IDP sites in Idleb. An estimated 99% of these returns are considered permanent. 99.8% of returning IDPs have returned to their districts of origin. The top five areas of origin for returning IDPs are: Al Marra, Jabal Saman, As-Suqaylbayah, Muhardah, and Idleb. In May, 605 individuals were newly displaced in Idleb and Aleppo, primarily from the sub-districts of Jebel Saman, Jisr-Ash-Shugur, and Idleb. The majority of the displaced have arrived in Atareb and Ehsem sub-districts. Current return movement by the sector is limited to sub district level, this pauses major gap in tracking actual returns to villages and communities. Enhanced community level monitoring of returns need to be establish to ensure data reliability 	
<p>Incidents Update</p>	<ul style="list-style-type: none"> Incident Report in May: A total of 13 incidents were reported in IDP sites during May, including 10 fire outbreaks, two floods, and 1 shooting incident. These incidents affected 13 IDP sites, resulting in damage to 225 tents. 	
<p>Aob</p>	<ul style="list-style-type: none"> CCCM reporting regarding Displacement and Incident will be covering all Syria starting from the next month.
