

### August Key Highlights:

- **230,309 individuals** reached through Site Management activities in August 2025. **Children** represented **66%** of beneficiaries, **adults 32%**, and **elderly 2%**.
- **231 participants (105 females and 126 males)** benefited from **15 capacity-building sessions** conducted for site committees, local authorities, and partners.
- **31 site management committees** established and capacitated across states.
- **7 functional Complaints and Feedback Mechanisms (CFMs)** established.
- **426 cases** referred and tracked by site management partners.
- **10 awareness-raising campaigns** conducted on governance, health, and cholera prevention.
- **3,448 Individuals** reached with site maintenance support.
- **226,178 Individuals** reached with site assessment activities.

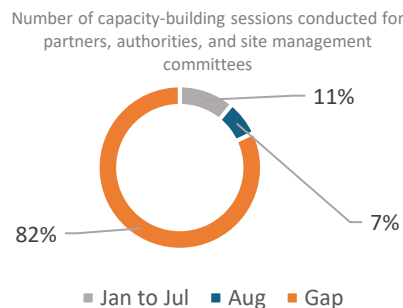

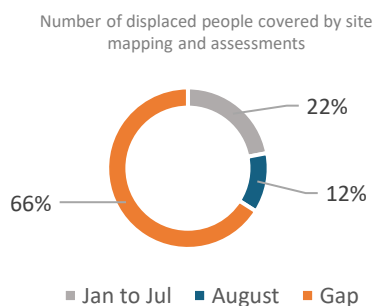

The boundaries and names shown and the designations used on this map do not imply official endorsement or acceptance by the United Nations.  
Abyei region: Final status of the Abyei area is not yet determined.

Cumulatively, **749,776 individuals** have been reached by Site Management activities from January–August 2025, representing **39%** of the HRP target (**1.9M** Individual).

### Progress Towards 2025 HNRP Strategic Objectives

#### Objective 1: Strengthen Access to Multi-Sectoral Services

- Site assessments in August 2025 reached **226,178** individuals across **Blue Nile (70,682)**, **North Darfur (92,408)**, and **Central Darfur (63,088)**. BMDO led registration and verification in Baw locality, Blue Nile, while NRC and UPO supported mapping and profiling in North Darfur camps, and DRC conducted assessments in Central Darfur.

- **3,448 individuals** benefited from site maintenance support in Gedaref and Tawila, North Darfur, through tarpaulin distributions for shelter repairs and community-led drainage maintenance around shelters.
- **NRC** referred **426 cases** through established CFMs in Tawila camps, with **76 individuals** receiving multi-sectoral assistance.

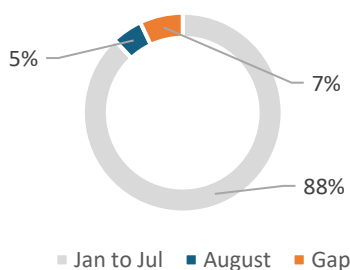

### Objective 2: Enhance Community Resilience and Engagement

Activity	Achievements			Gap
	Jan-July	August	Total	
Number of site management committees established and capacitated	4.95%	1.46%	6%	94%
Number of functional complaints and feedback mechanisms established	0.38%	0.66%	1%	99%
Number of referrals received and tracked by site management partners	9%	20%	29%	71%
Number of awareness-raising sessions/campaigns on key issues organized	14.53%	0.94%	15%	85%

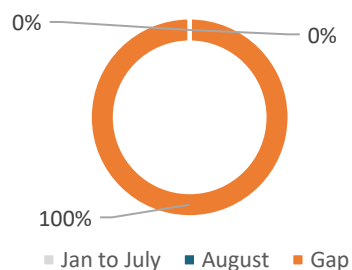

- **NRC, ACTED, BMDO, and UPO** supported the establishment and training of **31 site management committees** across Gedaref, White Nile, Blue Nile, and North Darfur. Training sessions focused on governance, ToRs, referrals, and cholera preparedness.
- **15 capacity-building sessions** were delivered by **NRC, ACTED, DRC, and UPO**, engaging over **231** committee members, local authorities, and partners.
- **NRC's** cholera sub-committees in Tawila organized awareness campaigns reaching over **426,000** Individuals with prevention and health messages.

### Objective 3: Improve Site Protection and Accountability

Number of people reached with site maintenance support (in-kind support)

Number of people reached with site maintenance support (cash for work)

- **NRC and ACTED** established **7 functional Complaints and Feedback Mechanisms** in Tawila camps (North Darfur) and informal sites in Gedaref, ensuring two-way communication with displaced communities.
- **NRC** tracked **426 referrals** through CFMs in Tawila camps, while **ACTED** supported community-led CFM processes in Gedaref and White Nile.
- **ACTED and DRC** engaged local communities in Gedaref, White Nile, and Central Darfur to strengthen participation and ensure inclusive representation in decision-making structures. **UPO** also delivered capacity-building for camp committees in North Darfur.

## Challenges

- Access and administrative approvals continued to delay site management roll-out in Central Darfur (Golo and Nertiti).
- Heavy rains and flooding restricted site maintenance activities in Gedaref, while damaging infrastructure in several informal sites.
- Limited partner capacity constrained timely follow-up on the high number of referrals in Tawila camps.
- Partners reported critical funding gaps in Blue Nile and White Nile, threatening the continuity of site monitoring and committee support.
